PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience building secure, scalable web applications using Java, Spring Boot, and REST APIs. Skilled in implementing authentication and authorization with Spring Security, JWT, and OAuth2, and in developing real-time features using WebSocket and STOMP messaging. Experienced with relational and NoSQL databases (MySQL, MongoDB), cloud deployment on AWS, and full stack development using React.js. Focused on writing clean, layered, maintainable backend code and delivering reliable, production-ready features across the full development lifecycle.

TECHNICAL SKILLS

Languages: Java, C++, C#, JavaScript, SQL

Backend: Spring Boot, Spring Security, REST APIs, JWT, OAuth2, WebSocket, STOMP

Frontend: React.js, HTML, CSS

Databases: MySQL, MongoDB

Cloud: AWS EC2, AWS S3

Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Agile, MVC Architecture

EXPERIENCE

Web Developer Intern

Jul 2025 – Aug 2025

Ainwik Infotech

Greater Noida, India

- Developed responsive, user-facing web applications using **React.js**, JavaScript, HTML, and CSS.
- Built and maintained a **MERN-based Course Management System**, implementing CRUD operations for courses and users.
- Integrated REST APIs with frontend components to enable seamless data communication between client and server.
- Improved frontend form validation and API request handling to strengthen application reliability.
- Collaborated with a team of developers following **Agile methodology**, participating in sprint planning and code reviews.
- Contributed to debugging, testing, and feature implementation across the application stack.
- Used **Git** for version control and maintained clean commit history throughout development.

PROJECTS

Secure Real-Time Chat Application

Spring Boot, Spring Security, JWT, OAuth2, WebSocket, STOMP, AES-GCM, MySQL, REST APIs

- Designed and developed a real-time messaging application using **Spring Boot** and **WebSocket/STOMP** for bidirectional, low-latency communication between clients.
- Implemented secure user authentication with **JWT** and **Google OAuth2 login**, alongside **Spring Security** for role-based authorization and access control.
- Engineered **AES-GCM encryption** for message storage to ensure confidentiality and integrity of persisted chat data.
- Built a layered backend architecture (controller-service-repository) with **MySQL** for reliable message and user persistence.
- Developed REST APIs to support user management, admin controls, and chat history retrieval.
- Implemented role-based access to separate standard user and administrator capabilities within the application.

Course Management System

MongoDB, Express.js, React.js, Node.js, REST APIs, Git

- Built a full stack **MERN application** enabling administrators to manage courses and users through a centralized dashboard.
- Implemented CRUD operations for course and user records with **MongoDB** as the persistence layer.
- Designed and integrated **REST APIs** connecting the **React.js** frontend with the **Express.js/Node.js** backend.
- Developed a responsive UI to support usability across devices, and used **Git** for source control and collaboration.

Dino Run Game

C++, SFML

- Developed an endless-runner style game in **C++** using **SFML**, applying object-oriented design principles.
- Implemented a core game loop with real-time collision detection and event-driven input handling.
- Built a procedural obstacle generation system to vary gameplay and increase difficulty over time.
- Added file handling to persist and load a high-score system across game sessions.

EDUCATION

Bachelor of Computer Applications

2023 – 2026

JCC, Rohini, Delhi

CERTIFICATIONS & ACHIEVEMENTS

Python Programming – IIT Madras | NIELIT 'O' Level | National Taekwondo Medalist | State Speedball Medalist | State Yoga Medalist | Smart India Hackathon (SIH) Participant | Solved 100+ DSA problems on LeetCode
